2. Buka GNS3
3. Buat project baru

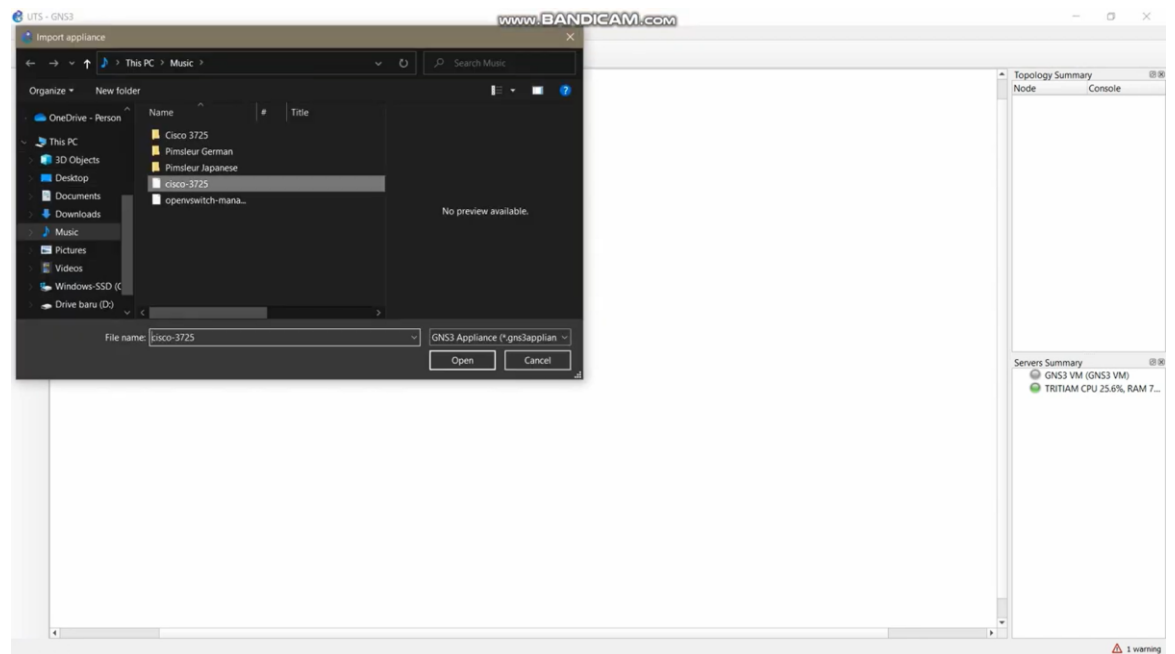

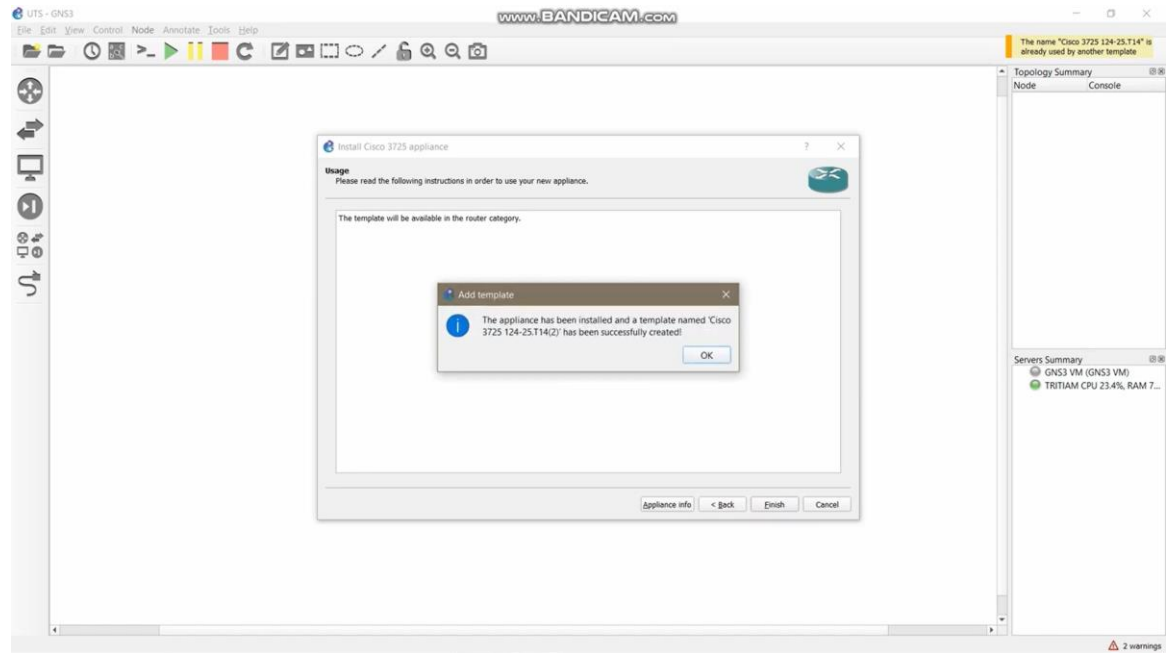

4. Import file yang telah didownload
 - Open vSwitch management

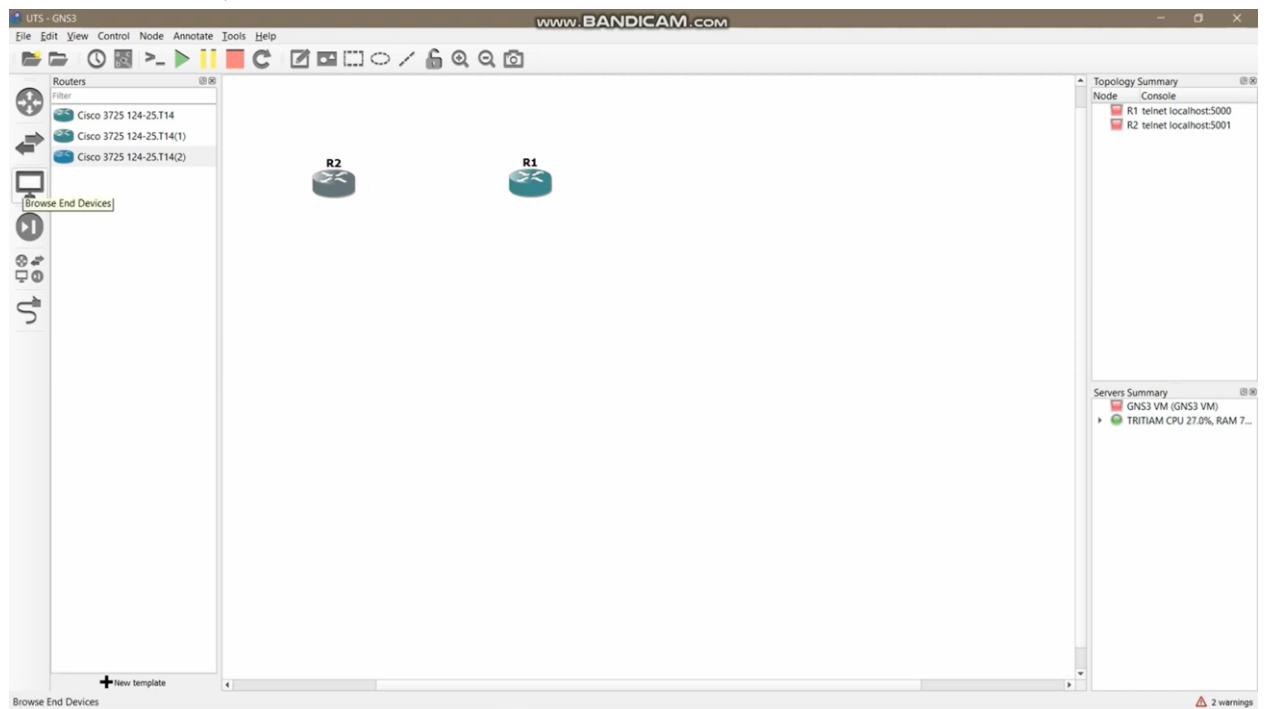

- Cisco 1725

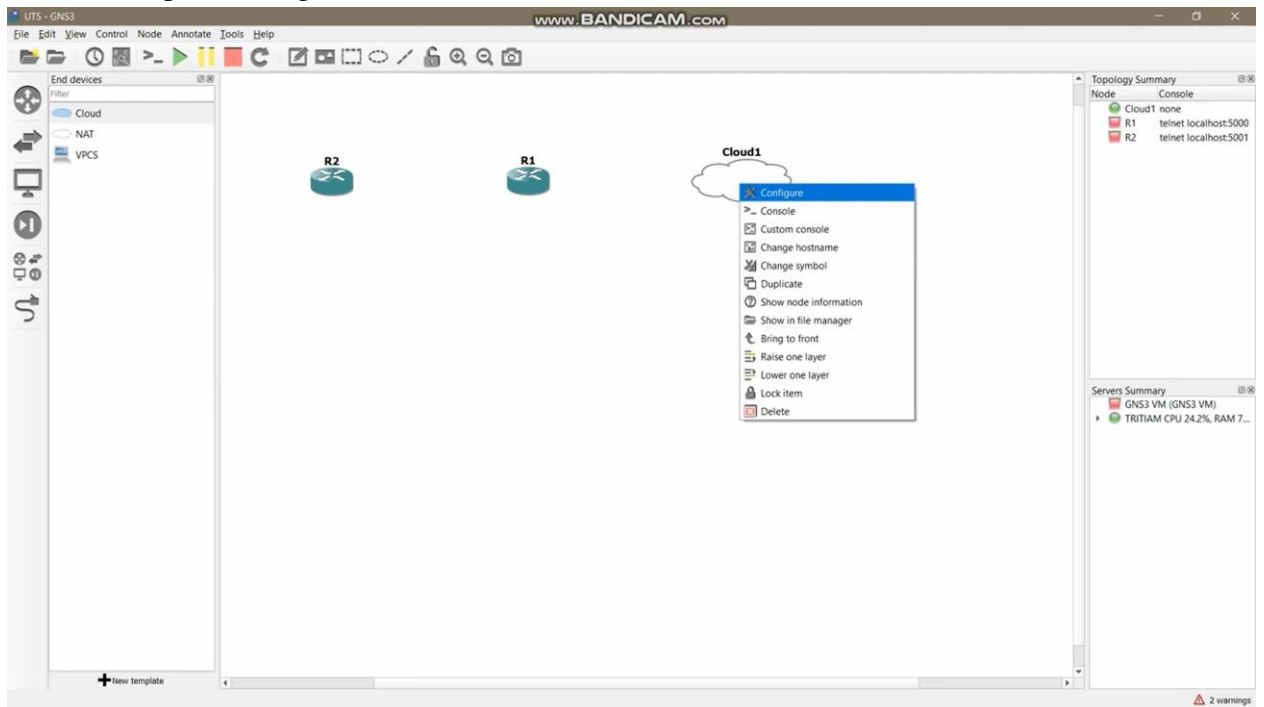

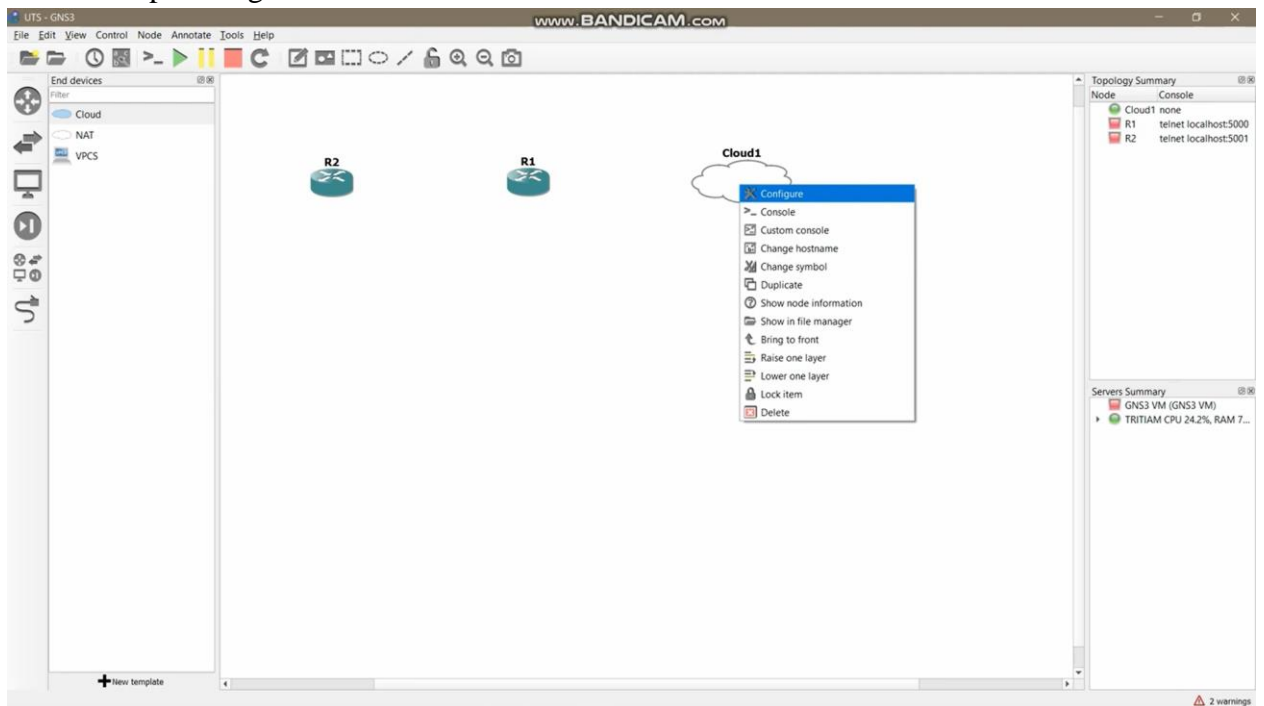

5. Buat topologi baru
Pilih Cisco 3725, lalu seret router 1 dan 2.

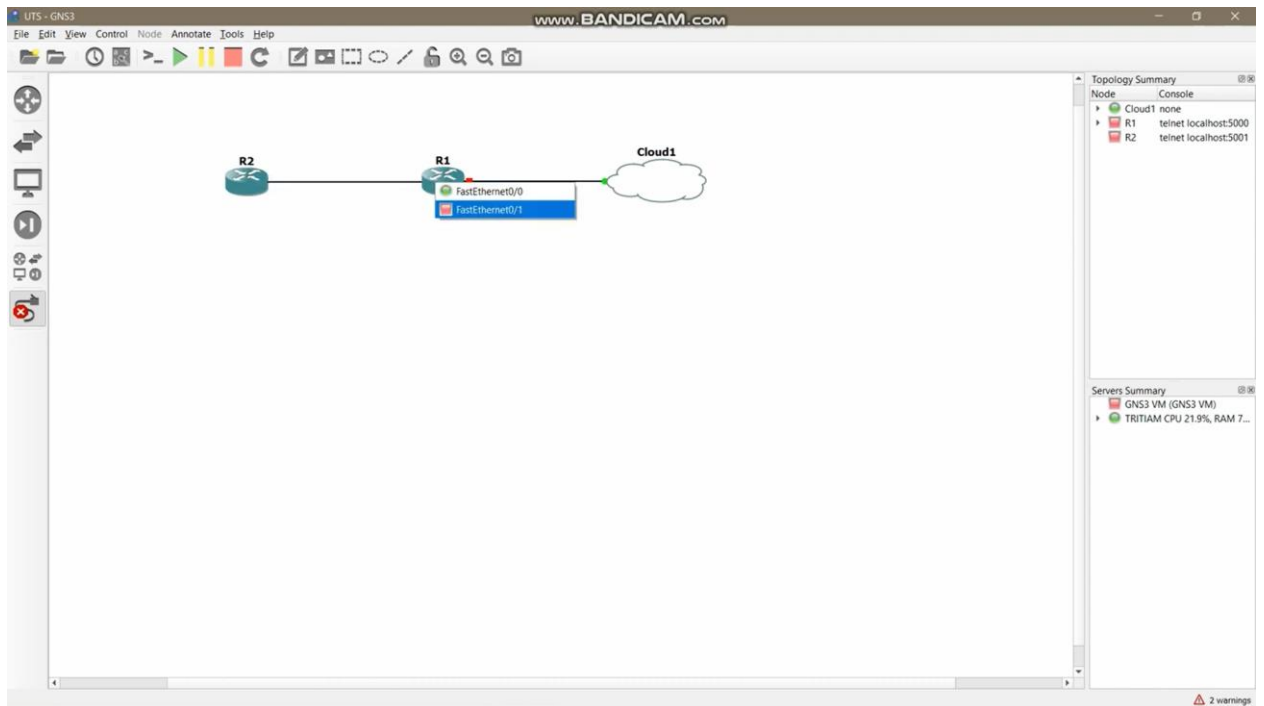

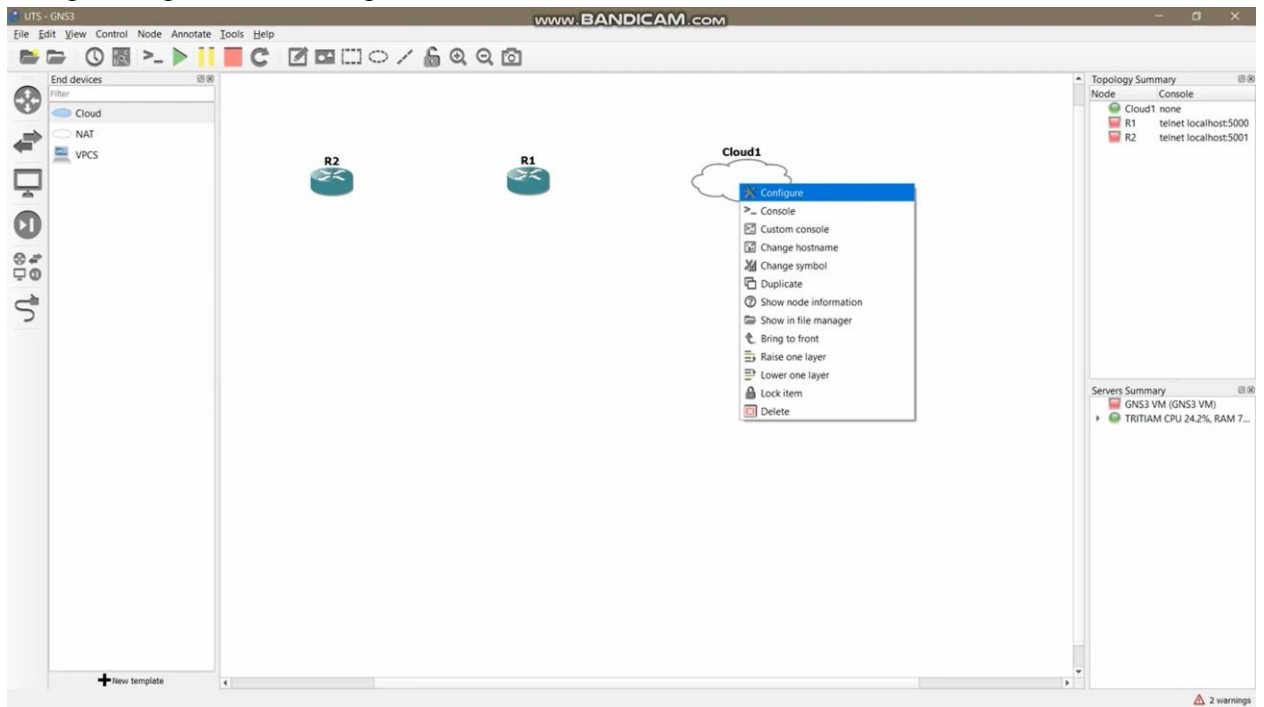

6. Dibagian end Devices, pilih cloud.
Klik kanan, pilih configure.

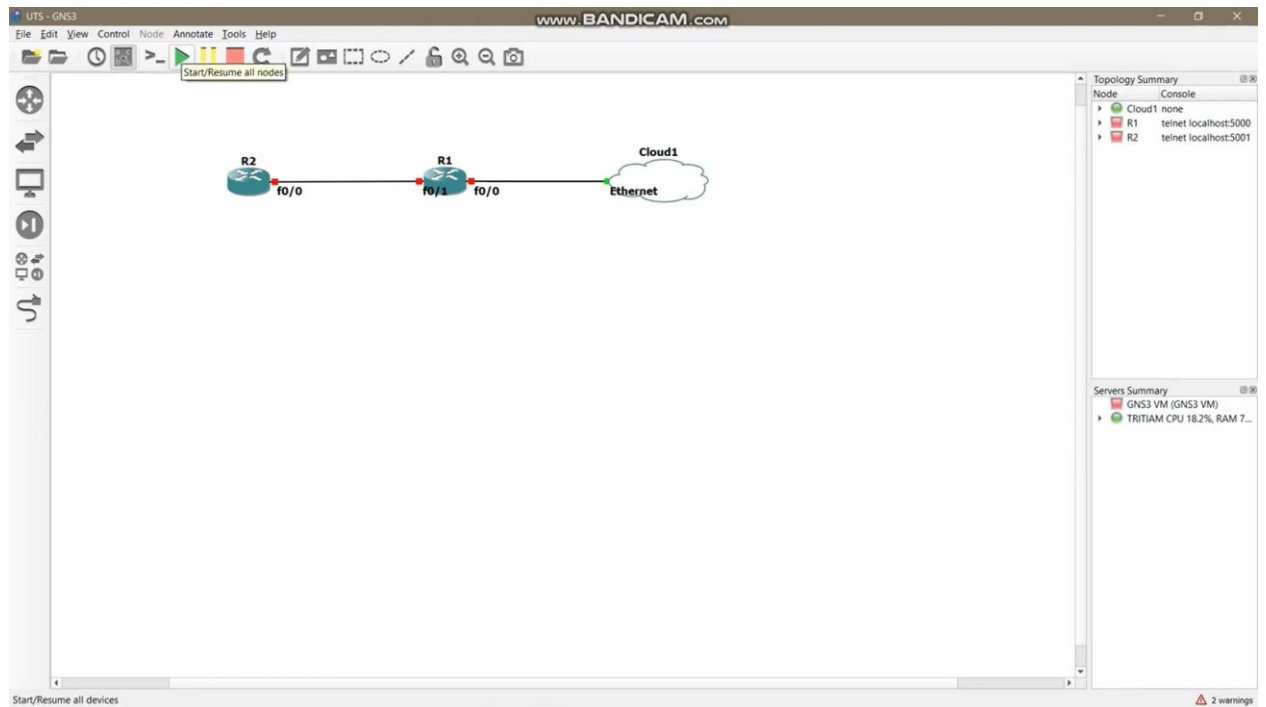

7. Klik kabel pada bagian bawah.

Menghubungkan router dengan cloud.

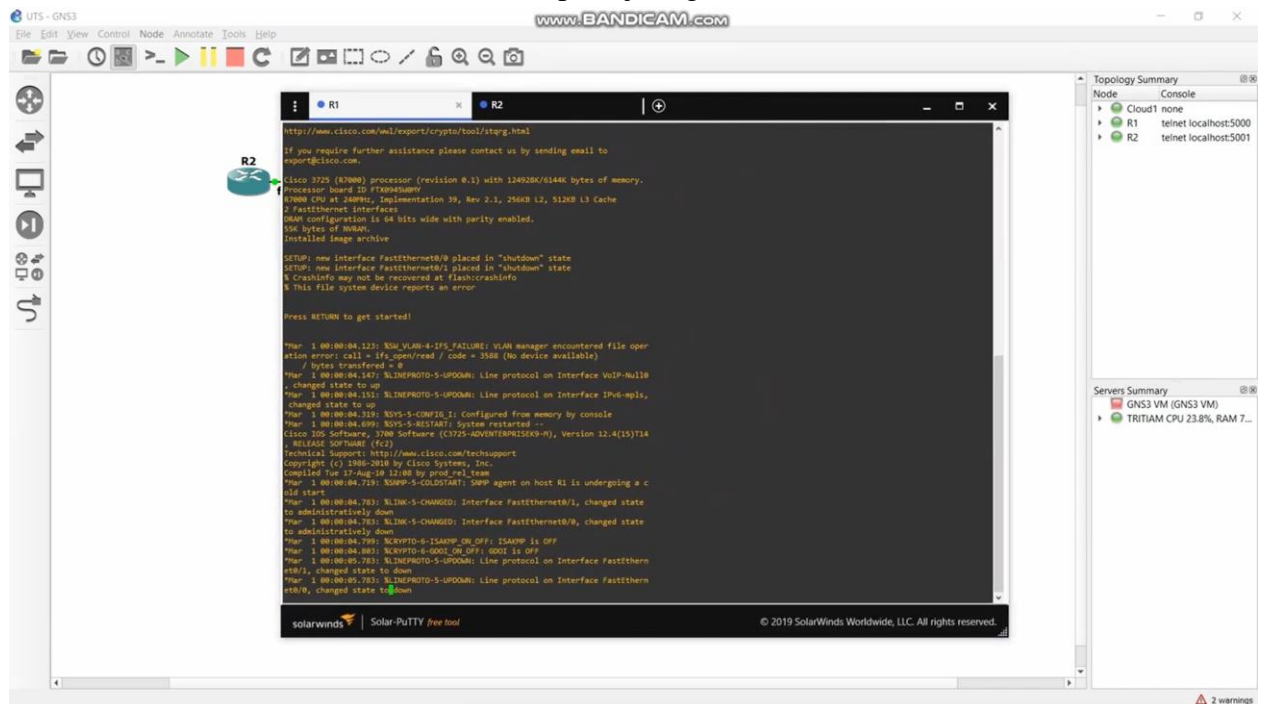

Bisa menunjukkan label dari setiap kabel router yang ada.

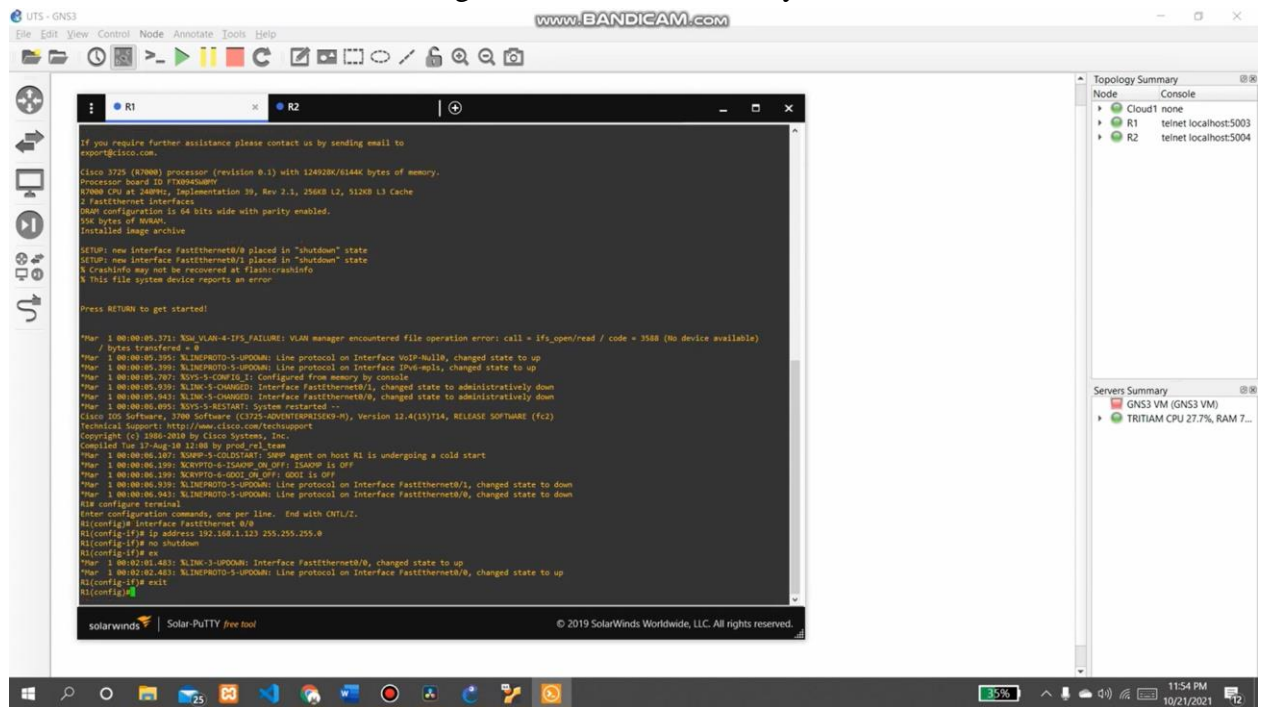

8. Klik start

9. Klik console connect to all nodes

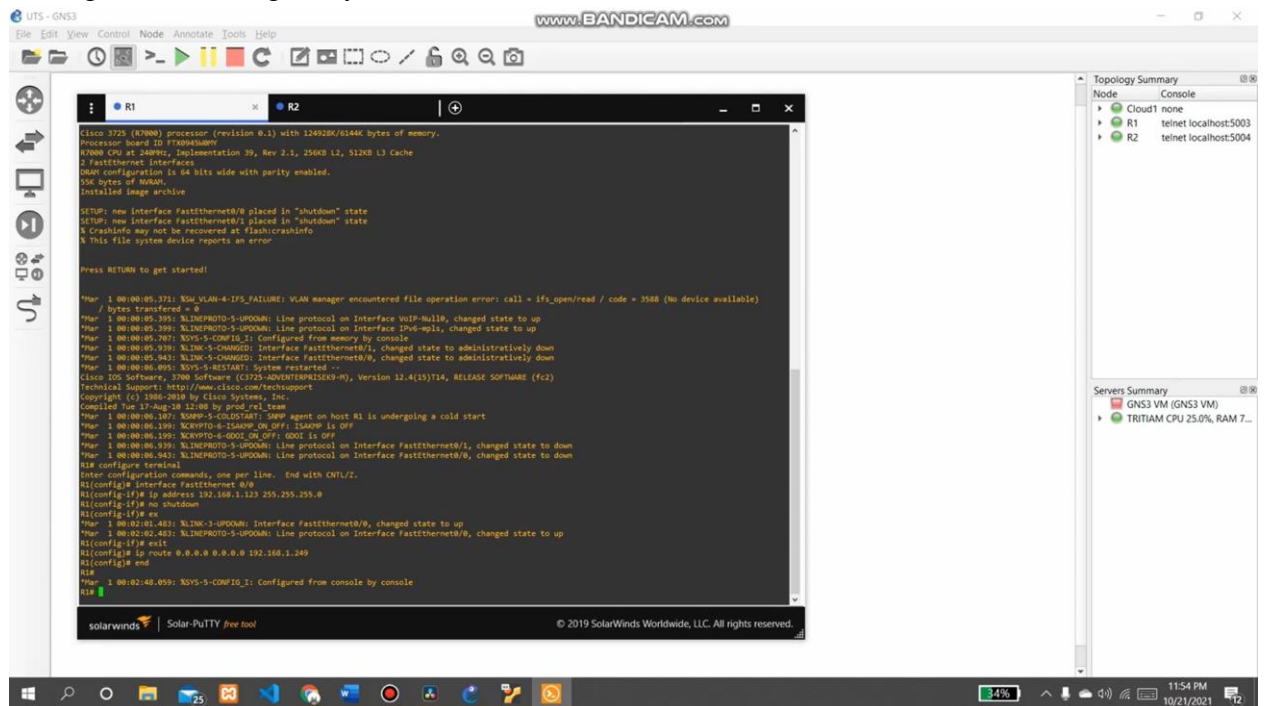

Disini kita akan membuka console router pada jaringan kita.

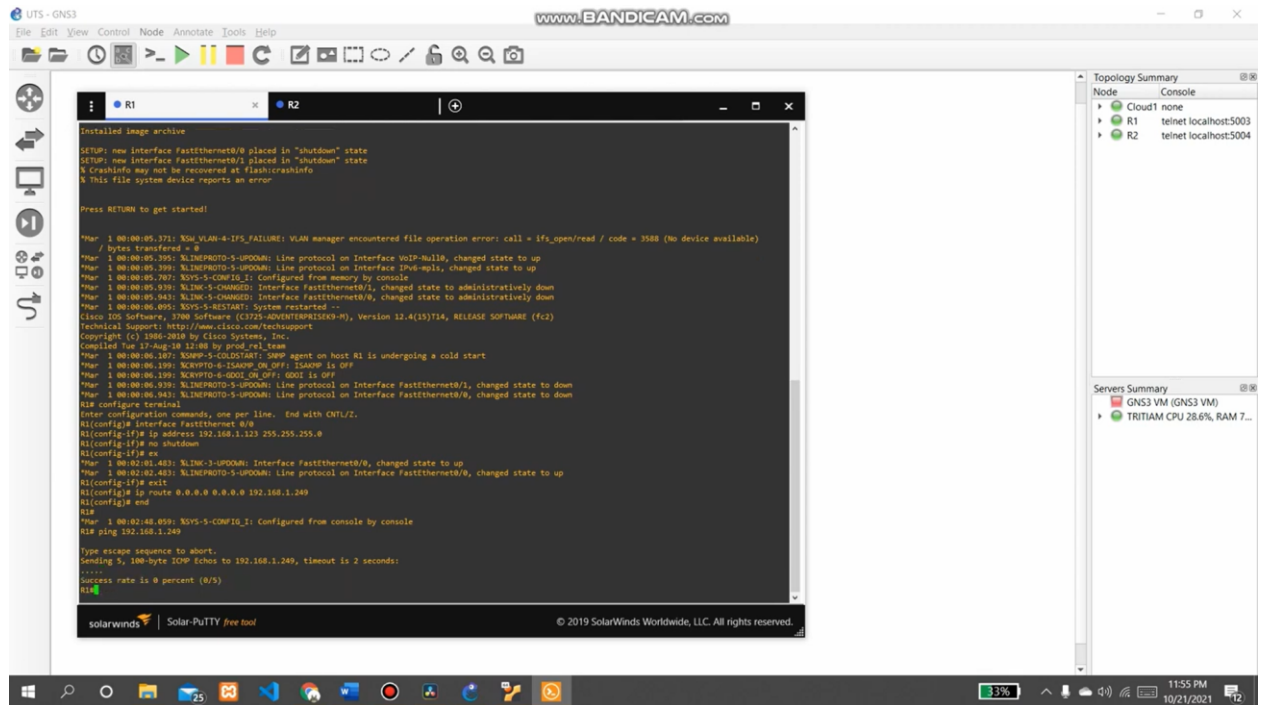

Pada router 1, kita akan coba konfigurasi static IP Address nya.

Konfigurasi default gateway

Kita akan coba ping gateway nya

10. SELESAI
